RRL-100 Remote Radio Link

What is the RRL-100?

The **RRL-100** is a revolutionary system of remote radio operation. It bridges your transceiver's main body and control head over TCP/IP network—providing you true remote operation, whether you're operating within your home of from the other side of the world.

Perfect for transceivers with detachable control heads, including:

- **Yaesu** FT-7800/7900, FT-8800/8900, FT-891
- **ICOM** 2720, 2730, 706, 7100
- **Kenwood** TS-480 SAT/HX

Features

- **Operate over any distance**
  Connect the control head and main body of your transceiver via your home Ethernet or over the internet. Your radio main body could be in Europe, while you roam across Asia.

- **Low bandwidth requirement**

  - Uses efficient G.711 codec (only 64 kbit/s audio bandwidth).
  - Operates reliably even in rural QTHs with just 1 Mbps internet.

- **CW ready (for HF models)**

  - Built-in CW support via **3.5mm stereo jack.**
  - Support both straight or paddle keyer.

Model variants:

Model	Supported transceivers
RRL-100A	Yaesu FT7800/7900 FT8800/8900 ICOM 2720/2730
RRL-100B	Yaesu FT891
RRL-100C	ICOM 706 7100
RRL-100D	Kenwood TS480 SAT/HT
